

VALLEY CARE CLINIC

Medical Consultation Note

Patient Name: Emily Davis

Date: 2024-08-31

Chief Complaint: Severe abdominal pain

Assessment:

Patient presents with acute abdominal pain in lower right quadrant.

Clinical examination suggests possible appendicitis or ovarian cyst.

Pain severity: 8/10, worsening over past 24 hours.

Medical Necessity:

CT Abdomen with contrast (CPT 74160) is medically necessary to:

- Rule out acute appendicitis
- Evaluate for ovarian pathology
- Assess for other acute intra-abdominal processes

Plan:

Order CT abdomen immediately

Patient instructed to proceed to imaging center

Follow-up after imaging results

Physician: Dr. Sarah Johnson, MD
